

## Report on Antigua and Barbuda

Antigua and Barbuda is ranked at 59th position on the 2011 Financial Secrecy Index. This ranking is based on a combination of its secrecy score and a scale weighting based on its share of the global market for offshore financial services.

Antigua and Barbuda has been assessed with 82 secrecy points out of a potential 100, which places it towards the top end of the secrecy scale (see chart 1 below).

Antigua and Barbuda accounts for under 1 per cent of the global market for offshore financial services, making it a tiny player compared with other secrecy jurisdictions (see chart 2 below).

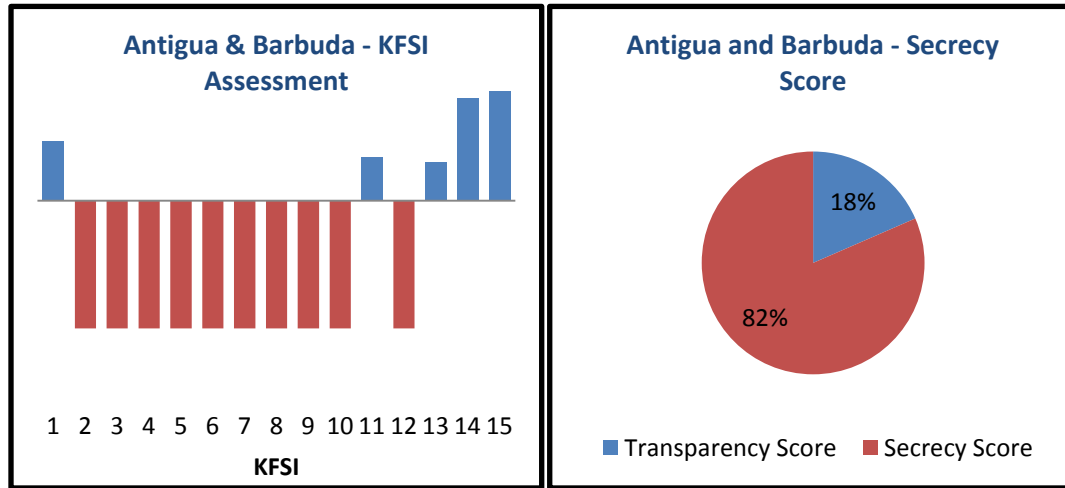

### Next steps for Antigua and Barbuda

Antigua and Barbuda's 82 per cent secrecy score shows that it must still make major progress in offering satisfactory financial transparency<sup>1</sup>. If it wishes to play a full part in the modern financial community and to impede and deter illicit financial flows, including flows originating from tax evasion, aggressive tax avoidance practices, corrupt practices and criminal activities, it should take action on the points noted where it falls short of acceptable international standards. See below for details of Antigua and Barbuda's shortcomings on transparency. See this link <http://www.secrecyjurisdictions.com/kfsi> for an overview of how each of these shortcomings can be fixed.

## Secrecy Scores

The secrecy score of 82 per cent for Antigua and Barbuda has been computed by assessing the jurisdiction's performance on the 15 Key Financial Secrecy Indicators, listed below.

The numbers on the horizontal axis of the bar chart on the left refer to the Key Financial Secrecy Indicators (KFSI). The presence of a **blue** bar indicates a positive answer, as does **blue** text in the KFSI list below. The presence of a **red** bar indicates a negative answer as does **red** text in the KFSI list. Where the jurisdiction's performance partly, but not fully complies with a Key Financial Secrecy Indicator, the text is coloured **violet** in the list below (combination of red and blue).
